The screenshot displays the VS Code interface with the REST Client extension. The left sidebar shows a list of requests, with the most recent one being a PUT request to `localhost:3000/user/1` made 3 minutes ago. The main editor area shows the details of this request, including the method (PUT), URL (`http://localhost:3000/user/1`), and the JSON body: `{ "firstName": "Yuvraj", "lastName": "Jangir", "hobby": "Running" }`. The response is shown on the right, indicating a `404 Not Found` status with a size of 26 bytes and a time of 3 ms. The response body is `{ "error": "User not found" }`. The bottom panel shows the Terminal with the output of the server running on `http://localhost:3000`, including logs for previous requests and their status codes.

The screenshot displays the Thunder Client application interface. On the left sidebar, there is a list of requests with a filter activity button. The main panel shows a PUT request to `http://localhost:3000/user/999` with a JSON body: `{ "firstName": "Test", "lastName": "User", "hobby": "Testing" }`. The right panel shows the response status `404 Not Found` with a size of `26 Bytes` and time of `3 ms`. The response body is `{ "error": "User not found" }`. At the bottom, a terminal window shows the server running on `http://localhost:3000` and logs the status of various requests: `GET /users` (Status: 200), `POST /user` (Status: 201), `PUT /user/1` (Status: 404), and `PUT /user/999` (Status: 404). An "Activate Windows" watermark is visible in the bottom right corner.
